About the job

We are driven to do more. More for our customers and the financial professionals who offer our products. If you are driven to do more and love the challenge of pursuing more, Athene is your kind of company. You will find we offer more than the basics to create an inclusive and dynamic work environment at our various locations.

Purpose:

Working at Athene is more than an internship — it's a game changer for your career. Being an intern at Athene is seeing your idea come into fruition through collaborating with a team. It's doing meaningful work with talented people. All internships are designed for you to create innovative solutions for our customers and the industry. Your internship is about making a difference in our communities. This is your chance to change the game with one of the leading retirement services companies in the United States.

You'll also gain experience working in an environment where AI and emerging technologies are changing how work gets done. You will have opportunities to use AI-enabled tools to analyze information, streamline routine work, generate ideas, improve processes or solve business challenges, while learning when and how to use AI thoughtfully and responsibly. Our goal is to help you build the AI fluency, critical thinking and adaptability that will be increasingly important throughout your career.

What you can expect as an Athene Intern:

- Professional development
- Social events
- Networking events
- Volunteer opportunities
- Community involvement
- Collaboration with other interns
- Paid housing option (if eligible)
- Internships will run from mid-May to early August

Interviews and hiring decisions expect to be completed prior to mid-November, with some being completed as early as late September. Qualified candidates must be enrolled at an accredited college or university for Fall term 2027.

Accountabilities:

- Assist the team in gathering information and testing new system changes
- Responsible for assisting full time staff with various initiatives within the actuarial and information technology departments
- Promote and build efficiencies and process improvements for application related activities
- Provide strong documentation over processes and data analysis performed

Qualifications and Experience:

- Pursuit of four-year degree in Management Information Systems, Statistics, Mathematics, Data Analytics, Information Technology, Business, Finance, or other related field required
- Strong analytical and problem-solving skills
- Self-motivated with the ability to work independently and effectively meet deadlines
- Experience with Excel, Visual Basic, SAS, SQL, Python, R, or Tableau is preferred
- Experience with AI tools preferred.

Pitch Why the Company Should Consider You

(Sell yourself using all the knowledge you gained about the company and how your skills relate to the position):

As a senior double majoring in Business Analytics & Information Systems and Marketing, I have experience using Python, SQL, and Excel to analyze data and solve problems. My coursework and work experience have also helped me develop strong communication, teamwork, and problem-solving skills. I believe these skills would allow me to contribute and grow as a Business Systems Analyst Intern at Athene.
